

Ci-Tri-Jell All Purpose Cleaner **DP212**

Features:

- Thick formulation, rinses film-free
- Safe on aluminum and paint
- Biodegradable, non-caustic
- Pleasant scent
- Contains no butyl or solvents

Product Description:

Ci-Tri-Jell is a medium viscosity, water-based, multi-purpose gel. It is biodegradable, non-caustic and does not contain butyl or solvents. It is a very effective degreaser that dissolves most oil and hydraulic fluid collections and is safe on polished and anodized aluminum. Also great at removing bugs.

Product Benefits:

Because of its thicker consistency, Ci-Tri-Jell stays where it is applied, which allows it to easily work through bugs, grease and oil. It sprays well through a trigger sprayer allowing for even application, reducing waste. Although thick, Ci-Tri-Jell rinses off easily with a pressure washer or high pressure hose and does not leave behind surface film.

Directions:

Ci-Tri-Jell may be applied by trigger sprayer or pressure tank for faster application. Use undiluted, let product set for 5 +/- minutes, depending on use, then rinse with pressure washer or high pressure hose. When used on aluminum, agitate with clean rag or soft brush, then rinse as contaminants on wheels can reactivate and stain. For best results, use warm water for rinsing. Paint safe when applied to a cool surface.

Packaging Options:

Quarts
Gallons
5 gallons
Drums
